Students engage in interactive activities to develop sustainability skills and help them find their perfect purpose-driven role.	Sustainable Futures Programme

What's next for you:

Continuous Professional development

Change Agents UK is a charity and not-for-profit organisation. Their **Green careers and the future workforce course** is available for Careers leaders and teachers.

Find out more here [Green Careers & The Future of Work | Change Agents UK](#)

The course consists of three modules:

1. Overview of the climate crisis and sustainability – Where are we? How did we get here? How climate and sustainability link to different sectors and roles? Does business as usual need to change?
2. Future of work in the Green Transition – The Key impacts of the green transition on jobs, The green sector & “all jobs are green jobs”, Finding a green career, Corporate sustainability & identifying sustainable organisations

3. Sustainability skills & student journey -The core sustainability competencies wanted by employers, How we can help students to develop these skills within our offers, How we can best support students to enter green jobs and thrive in the green transition

They can host it in-person or online with two options:

- A three-hour workshop suitable for those who are time-scarce and/or already have some understanding of climate and sustainability topics
- An extended full-day workshop, which is recommended for those at the start of their sustainability journey who may want or need a more thorough overview of the green transition and sustainability skill

Want Green Careers training for your students?

Their **Sustainable Futures Programme** is the student equivalent of our Green Careers & Future of Work training. They provide an overview of climate change and sustainability. Students engage in interactive activities to develop sustainability skills and help them find their perfect purpose-driven role. Suitable for students in further education, higher education and recent graduates

Want something else? They work with many education settings to create bespoke courses suitable to their students' needs and availability, including shorter sessions as part of Green Careers Weeks.

WWF: Sustainable futures:

Explore their package which free training for teachers and careers leads on how to deliver the modules and downloadable student resources. For students aged 14-18. The course includes three modules, split into bite-size 30-minute learning units for maximum flexibility. It can be delivered as part of your careers provision, within curriculum subjects or as an extra-curricular activity.

To share with your students:

1.The Green Careers Hub provides access to information and opportunities around green skills, jobs and careers. [Home - Green Careers Hub](#)

Green skills

An umbrella for the knowledge, behaviours, capabilities and technical skills required to tackle the environmental challenges we face and to unlock new opportunities for growth.

Find your Green role

The green transition is rapidly accelerating; we are seeing more, and roles advertised every year. Find job profiles, careers journey stories and organisational case studies.

2.The British Council website has a section devoted to Green Careers, where you can access videos [Green careers guide | British Council](#)

Green Carers Alumni videos

Green Careers webinars

Green careers Directory

3.Don't forget to use the videos and information on the **WWF website** showcasing sustainable futures across a range of sectors: sport, farming, entertainment, fast fashion, law, AI, waste management, solar power, fashion, repurposing CO2, tourism, cyber security and the film industry.

- Fourteen Green careers specifically Industry information – Great for generating discussions

- Green Careers videos from 5 sectors – food and farming, Sports, Entertainment, Business and Finance and Fashion.
